Our CO_2 footprint 2020-2024: GHG emissions in tonnes of CO_2 e (Scope 1 and 2)

		20	20	2	20	20
Total GHG emissions (Scope 1 and 2)		**62,779**	**69,993**	**70,106**	**79,331**	**70,415**
Total Scope 1 emissions		**28,418**	**29,934**	**28,534**	**29,241***	**30,187**
Scope 1	Of which direct Energy consumption at sites	21,369	22,414	21,170	21,003	21,381
	Of which direct energy consumption of company vehicles	7,048	7,520	7,364	8,238	8,806
Total Scope 2 emissions		**34,361**	**40,059**	**41,572**	**50,090****	**40,228**
Scope 2	Of which electricity	32,115	36,546	38,351	47,243	38,054
	Of which district heating	2,246	3,513	3,221	2,847	2,175

* The higher CO2e in 2023 is due to the increase in EF as a result of changes in the electricity mix due to the energy crisis (including a higher share of coal-fired electricity in the energy mix).
** CO2 emissions for 2024 are partly extrapolated
